PROFILE SUMMARY

- B.Tech student in Industrial IoT at NIT Kurukshetra with hands-on experience in DevOps and CI/CD engineering. Familiar with production-oriented practices using Docker, GitHub Actions, and AWS.
- Additionally skilled in GEN AI, Android development (Java, Kotlin), full-stack web development, IoT systems, and Machine Learning, with a strong interest in building scalable, real-world engineering solutions. Seeking internship opportunities in high-impact technical teams.

EDUCATION

•National Institute Of Technology, Kurukshetra

CGPA : 9.0488/10

B-Tech in Industrial Internet Of Things

2023-2027

•Sainik school Korukonda

Percentage: 92.2

12th, Central Board of Secondary Education, Andhrapradesh

2023

EXPERIENCE/PROJECTS

•BuildPulse | Android CI/CD Pipeline with AI-Powered Failure Analysis

2025

Tools/Technologies: Docker, Node.js, GenAI, Github Actions, Kotlin, AWS, CI/CD

- Built a fully containerized Android CI/CD pipeline using Docker and GitHub Actions, enabling reproducible builds and achieving 100% automated build and test coverage across commits.
- Integrated LLM-based failure analysis with controlled prompting and validation layers to automatically diagnose Android build and test errors, focusing on safe automation, hallucination mitigation, and deterministic CI behavior.
- Developed and deployed a Node.js-based web dashboard on AWS EC2 to visualize build status and AI insights in real time, improving CI observability and failure traceability by 60%.

•Code Pilot | Real-Time Collaborative Code Review Platform

Ongoing

Tools/Technologies: React, Node.js, Express.js, Supabase, PostGRE SQL, Socket.io, Hugging Face

- Developed a real-time code review system with multi-user collaboration using Socket.io, enabling synchronized edits and reducing review turnaround time by 45%.
- Integrated Supabase-backed review history and analytics, allowing users to track progress and revisit prior reviews, boosting review traceability by 60%.
- Deployed Hugging Face AI models to provide automated code feedback and quality insights, improving bug detection accuracy by 40% during peer reviews.

•Green Pulse | Smart Irrigation IoT App

2025

Kotlin, Jetpack Compose, Firebase, NodeMCU (ESP8266), Gemini API

- Built an Android IoT application that automated irrigation using real-time soil moisture and temperature data collected via NodeMCU, reducing manual intervention by 70%.
- Visualized live environmental metrics through dynamic charts, improving farmers' decision-making speed by 50%.
- Integrated AI-powered crop recommendations using Gemini API, boosting yield potential by 30% through data-driven farming insights.

TECHNICAL SKILLS AND INTERESTS

Languages: Java, Kotlin, Python, JavaScript, SQL, C, Embedded C, MATLAB

Developer Tools: Git, Docker, GitHub Actions, Android Studio, VS Code, Firebase Console, Hugging Face, Google Gemini API, Postman

Frameworks: Jetpack Compose, React.js, Express.js, Room DB, Socket.io, Streamlit

Cloud / DevOps: AWS EC2, Docker Compose, CI/CD Pipelines, Linux, Nginx, Cloudflare

Databases: Firebase Realtime Database, Firebase Storage, PostgreSQL

Soft Skills: Problem-Solving, System Thinking, Team Collaboration, Leadership, Technical Communication

ACHIEVEMENTS

•Top Performer Smart India Hackathon

October 2024

•AIR 78 in NDA 151 Ranked 78 in final merit list among 4 lakh candidates appeared

October 2023

•500+ Problems solved on LeetCode

Ongoing
